Washington Alberta Land Co. Ltd.  
THOMAS AMERY,  
Secy.-Treas.

Wanted.—You to Advertise  
your wants and articles for  
sale.

### Local and General:

Mr. S. Willis was appointed Auditor for the Village at the last meeting of the Council.

P. I. McAnnally was confined to the house for a few days this week. We are pleased to say it is not a repetition of his former severe illness.

McRory and Sons have just taken the agency of the "Flot" Electric Lamps. Call and let them show you how convenient these are.

Come in crowds! Where to? The Concert, on Thursday next, November 13th.

Mrs. Evans, of Millarville, is spending a few days with her sister Mrs. E. E. Edwards.

H. U. Crockett has just left here for the old home Clinton, Iowa. Having spent the summer with his partner Mr. Jones.

If you require to renew your old Loan or take out a new one call and see me, as I can save you money. I represent the N. of Scotland Can. Mortgage Co., The Canada Life, and others. CHAS. HULTORIN.

Her friends at Crossfield will regret to learn that Mrs. A. Thorold-Eller and the Misses Isobel and Barbara Thorold-Eller are down with typhoid fever at their home, The Rectory, Brooks.

Geo. Becker has just purchased a Gasoline Engine and Grinder, and hopes in a few days to be able to take in grinding for the public.

Mr. Schofield who reports having just threshed his crops, approximating ten thousand bushels all pedigreed grain, left a sample of the famous Garton No. 22 oats at the office which averaged ninety bushels to the acre.

Don't forget the Grand Concert which takes place on Thursday Evening, Nov. 13th. The artists are: Miss Margaret Munro, soprano; Miss Cline, Elucidationist, who will be remembered from her visit, and her effective rendering of several selections last year. Miss Aylward, Accompanist. The Concert to take place in the L.O.O.F. Hall. Being under the auspices of the Ladies' Aid we are assured of a treat. Reserved Seats 75c., admission 50c.

Through agitation the U.F.A. and Grain Growers Grain Co. have started a market in Calgary to handle members of the U.F.A. produce on commission for cash. Address Grain Growers Grain Co., Calgary, Stall 23, for information Phone or see THOS. FITZGERALD.

Has the chicken season been extended, or has it not, that is the question which is bothering the nimrods this last week.

### ENORMOUS INCREASE.

Subscribers to The Family Herald and Weekly Star, of Montreal, are renewing earlier than ever this season. The subscription receipts for October were over 80 per cent. ahead of October 1912. The Family Herald grows in popularity year after year. It is the big dollars worth beyond doubt, and deserves its immense circulation. Any home that does not receive The Family Herald should give it a trial for 1913.

What could be nicer than to send a private Greeting Card to your friends and relations for Christmas. Call at the Chronicle Office and see our specimens.

## CROSSFIELD LOCAL &amp; GENERAL.

S. H. Bray was a business visitor to Acme on Wednesday of this week.

Mrs. Geo. O. Davis and children are leaving Crossfield this week. They go to join Mr. Davis who is at present working in the mines at Drumheller.

Miss Guesner who has been visiting her sister Mrs. Wm. Latt during the past summer is leaving for the east at the end of the week.

What 'is the matter with the Quadrille Club this year. Now that threshing is about completed it is time someone was taking the initiative to get this going.

Don't miss the Concert on Nov. 13th, in the I.O.O.F. Hall.

Melville Donald, who has been doing construction work for the C.N.R. in the north country, has completed his contract, and has brought his outfit to Crossfield for the winter.

A. R. Thomas was a business visitor to Calgary over the week end.

You can dispose of all your new laid eggs at 40c. a dozen at Wm. Urquhart's.

Jas. Fox, a thresher who moved his outfit from High River, made a record the other day on a farm near Carstairs, when he threshed 620 bushels of oats in an hour.

Sam Collins visited Calgary on Saturday last?

We are pleased to note that Mr. Wm. Urquhart is making preparations to have the rink going this winter, and already the young bloods of the town are talking hockey. Skating is a form of sport which appeals to all ages and no doubt this will be well patronized.

Mr. T. E. Bills, Manager for the Alberta Pacific Grain Co., has found it necessary to open the Sunny Belt Elevator in order to take care to the extra amount of grain which is coming his way.

Earl Brown completed his threshing season on Saturday last, having run thirty-two days and turned out in that time a little over sixty-seven thousand bushels.

Refer to W. Urquhart's full page advertisement for Cash prices of his goods. It will be noticed there are large number of additions this week. His slogan is "Deal Where it Pays to Buy for Cash."

Call at the Chronicle Office and have a look through our Specimen book of Private Greeting Cards.

## SYNOPSIS OF CANADIAN NORTH-WEST LAND REGULATIONS

THE sole head of a family, or any male over 18 years old, may homestead a quarter-section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-agency for the district. Entry by proxy may be made at the office of any Local Agent of Dominion Lands (not sub agent), on certain conditions.

Duties.—Six months' residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres, on certain conditions. A habitable house is required in every case, except when residence is performed in the vicinity.

In certain districts a homesteader in good standing may pre-empt a quarter-section alongside his homestead. Price \$2.00 per acre. Duties.—Six months' residence in each of six years date of homesteaded entry (including the time required to earn homesteaded patent) and fifty acres extra cultivation. The cultivation is subject to reduction in case of rough, scrubby or stony land after report by Homestead Inspector on application for patent.

A homesteader who has exhausted his homesteaded right and cannot obtain a pre-emption may take a purchased homestead in certain districts.—Price \$3.00 per acre. Duties.—Must reside six months in each of three years, cultivate 40 acres and erect a house worth \$500.00.

W. W. CORY,

Deputy of the Minister of the Interior.

## HOW MANY PLANTS

## IN YOUR RIDING?

Questions For Members of Parliament

Wh. Are Considering

Tariff

It is suggested by Industrial Canada that every member of Parliament who is considering the tariff issue should ask himself and his electors the following set of questions fraught with vital import to the future of his constituency and the country at large.

The questions are:

1. How many factories are in your constituency?

2. What amount of capital is invested?

3. How many people are employed?

4. What is the annual output?

5. Where does each manufacturer get his raw material and what duty does he pay on it?

6. What protection has each manufacturer on his finished product?

7. What is the difference between the duty on each manufacturer's finished product and the duty on his raw material, which difference is his real protection?

8. Where does each manufacturer sell his product and what competition does he have to meet?

9. What advantage would his competitors gain by a reduction in the tariff?

10. What is each manufacturer's wage roll?

11. Where is this wage spent?

12. What proportion of the inhabitants in each city, town and village in your constituency are factory employees or dependent upon factory employees?

13. How much British and foreign capital is invested in manufacturing in your constituency?

14. How many immigrants are attracted to your constituency by the hope of getting positions in factories?

15. How much farm produce is consumed annually by the factory population of your constituency?

16. What are the special transportation problems of the manufacturers in your constituency?

17. What are the special transportation problems of the manufacturers in your constituency?

18. What are the special transportation problems of the manufacturers in your constituency?

19. What are the special transportation problems of the manufacturers in your constituency?

20. What are the special transportation problems of the manufacturers in your constituency?

21. What are the special transportation problems of the manufacturers in your constituency?

22. What are the special transportation problems of the manufacturers in your constituency?

23. What are the special transportation problems of the manufacturers in your constituency?

24. What are the special transportation problems of the manufacturers in your constituency?

25. What are the special transportation problems of the manufacturers in your constituency?

26. What are the special transportation problems of the manufacturers in your constituency?

27. What are the special transportation problems of the manufacturers in your constituency?

28. What are the special transportation problems of the manufacturers in your constituency?

29. What are the special transportation problems of the manufacturers in your constituency?

30. What are the special transportation problems of the manufacturers in your constituency?

31. What are the special transportation problems of the manufacturers in your constituency?

32. What are the special transportation problems of the manufacturers in your constituency?

33. What are the special transportation problems of the manufacturers in your constituency?

34. What are the special transportation problems of the manufacturers in your constituency?

35. What are the special transportation problems of the manufacturers in your constituency?

36. What are the special transportation problems of the manufacturers in your constituency?

37. What are the special transportation problems of the manufacturers in your constituency?

38. What are the special transportation problems of the manufacturers in your constituency?

39. What are the special transportation problems of the manufacturers in your constituency?

40. What are the special transportation problems of the manufacturers in your constituency?

41. What are the special transportation problems of the manufacturers in your constituency?

42. What are the special transportation problems of the manufacturers in your constituency?

43. What are the special transportation problems of the manufacturers in your constituency?

44. What are the special transportation problems of the manufacturers in your constituency?

48. What are the special transportation problems of the manufacturers in your constituency?

49. What are the special transportation problems of the manufacturers in your constituency?

50. What are the special transportation problems of the manufacturers in your constituency?

## NATIONAL POLICY

## A POTENT FACTOR

In Canada's Enormous Progress—Great Strides Since Introduction of Protection

In his vaudeville Mr. A. R. Clarke, retiring chairman of the Toronto Branch of the Canadian Manufacturers' Association said in part:—

"It is satisfactory one sense, to have more orders offering than we can fill, but if we do not take care of the orders, some one else does, and the result is an economic loss. There is a heavy economic loss in Canada. Very large amounts of money are sent to foreign countries for the purchase of merchandise that could be made in Canada."

"May I recall the fact that it was in 1878 that the National Policy was announced, and that following its announcement it was endorsed, not only by the Canadian Manufacturers' Association, but by the people at large. Though thirty years have since elapsed, the same policy, with such few modifications as changing conditions have warranted, has been the bulwark of Canada's prosperity."

"It was realized then, as it is now, that it was essential that Canadian industry should have protection in its own market and that Canada should not be made the slaughter market for our neighbors to the south. That this result has been achieved in some measure is apparent in the great development in size and variety of industries that have grown up in Canada, in many cases from small beginnings. This policy of moderate protection has been a very decided factor in turning the tide of immigration in our own direction."

"It behooves us, therefore, as consumers, producers, manufacturers, or as citizens—take it any way you will—to stand together and resist any attempt to turn back the established prospect which dominates Canada at the present time. The Canadian West is securing a number of the industries fostered by the tariff, and it stands to obtain a great many more under a perpetuation of the present fiscal policy."

## Court Cards And Cupid

The Jack Captured the Queen  
and King.

By COLIN S. COLLINS.

"Jack of Spades," Culbert called him that first morning he had gone to work in the Buckley building. Protests to the effect that his name was John Ryemours were of no avail. His name was Jack, and he was as black as the ace of spades, so the name stuck.

At first he was angry, but one could not remain angry long with Kingsland Culbert, and in the end Jack worked up by paying him a hero worship that at times threatened to cost the man his position, for with Culbert in the elevator it ran express to the next to the top floor, no matter what the other passengers might threaten.

But Jack had gained the position through having saved Buckley's little girl from a runaway accident, and he more readily submitted to the complaints and suggestions that perhaps the elevator had become unmanageable.

Until Edith McQueen came Culbert had reigned alone, but after that he was relegated to second place, the only instance where, as the saying is, the king was dethroned. The queen, of course, was Edith, the queen overlooking both king and Jack to the peak.

Mrs. McQueen was employed by Hodgman & Pettit, whose office was on the third floor, and was Culbert's habit to drop off at their offices on his way out to lunch and pick up the girl. He had obtained the position for her, and it was understood that they were engaged, though no golden band announced that fact.

Then there came the day when Jack noticed that Miss McQueen had been crying when she came in. Culbert did not arrive until late, and his face was drawn and very white. He did not even smile when he nodded to Jack. When he went out to lunch he stayed twice as long as usual, and when he did return it seemed to Jack that he had had more than the one cocktail he usually allowed himself.

Mrs. McQueen did not go out to lunch at all, and when she came back she went down to lunch together. Jack slipped into the office to ask if he could bring her to something. There he found her with her head upon her arms. Her eyes glistened with tears as she raised her face at the sound of his entrance.

"Don't you want a cup of tea, Miss Queen?" he pleaded. "It's also good for the headache."

She shook her head with a little smile, and Jack slipped out again. That night the car passed Culbert's twice before it stopped for him. A king had been deposed.

But he was reinitiated again because of his evident suffering. After that first day he did not report the cocktail episode; indeed, he seemed oblivious to lunching and never by any chance used the elevator when Miss McQueen might happen to be going out or in.

Jack pondered the matter, and there was only one conclusion possible in his limited experience. There had been a quarrel, and both were too proud to speak first.

It grieved him because they were good friends of his, these two, and their quarrel hurt him as much as it seemed to hurt them. More than once he was tempted to speak to one or the other and tell how the other suffered, but a certain dignity held him back, and he could only miserably wait the turn of events.

Then came Jack's score. It was a dull afternoon, and he let the elevator drop slowly down. At the ground floor he was thrown open the door to look up at a huge policeman; not Charlie, who had the best and who sometimes came in to get water, but another man, a stranger.

Though he had never had direct dealings with the police, Jack was afraid of them. To him they were not guards of the peace. They were men who arrested people. When the big man demanded to know where Miss McQueen was in, refreshing his memory as to the name from a formidable looking document, Jack's heart sank.

"I want to see her about a stolen watch," he added, and Jack's chattering was complete. The little chatterer she had never before been so completely by a more elaborate array of gold with a long chain. It must be this one that was wanted.

There was only one thing to be done. Hadn't Mr. O'Connell got the janitor out of jail that time he had trouble with his wife? Jack ran the car up to the sixth floor and with a vague "go to the left" shut the door and dropped down to the third.

He burst in upon Miss McQueen with a face gray with fear and a stammering. She rose uncertainly at his call and came into the hall.

He fairly dragged her into the car and shot up to the top floor. Through the lattice guard he could see the officer descending the stairs. Some one had told him where the girl worked, and he was going after her.

Fighting with fear, he stopped at the seventh floor and pushed Miss McQueen into Culbert's office, closing and locking the door after him. Culbert looked up wearily from the desk.

"What's the matter, Jack?" he demanded, with a formal bow to the girl.

"Jack's a police-man after her," he explained. "He does stole a watch, and he's after her."

"What are you talking about?" Culbert cried. "Miss McQueen a thief?"

"He does say he want to see her about a watch that was stole," insisted Jack. "Ah, does hear him."

A policeman wishes to see me," asked the girl. "About a watch?" Jack nodded. "I think I can explain," and went on, turning to Culbert.

"When we happened to be together wearing your watch and used mother's. I left yours on the bureau, and when I came home it was gone. I am sure it was stolen by you. I suppose they have caught the thief and wish me to identify my property."

"So what have I to do with it?" he asked.

"I don't know," she replied. "Jack just came after me, his face livid with fear. I supposed that something terrible had happened, that perhaps—"

"I was in trouble," Culbert suggested, supplying the break. "I have been tempted to, but it seemed cowardly to kill myself. What I cannot understand is Jack's chain of reasoning."

"Ah, he was for to stop people from going to jail!" the girl demanded. "And ain't you the law?"

"You cannot expect me to answer 'no' to that," laughed Culbert. "That's it," explained Jack. "I bring her up here to save her."

The two threw back their heads and laughed, and in that laugh the misunderstandings were forgotten. Culbert tucked her under his arm in the old familiar way and unlocked the door.

"I guess I'll go down with you and see the officer," he said. "It looks important to have your attorney."

He threw open the door, and Jack slipped out. There was a soft but significant sound that brought a grin to Jack's face, and then the two followed him into the car.

The big policeman grinned at Jack in most friendly fashion when the latter's car entered, and he stepped into the car. On the top trip Culbert dropped a bill into his hand.

"Here's a piece of wedding cake goes with this," he said, "but that comes a little later. This is a time, my boy, when the Jack of Spades captured the Queen of Hearts and the King of Clubs."

"Yes," assented Jack, wondering what that meant. He knew about the wedding cake and the dollar bill. The rest was Greek, but satisfactory because his king and queen were pleased.

### An Airplane Compass.

A compass has now been made for aeroplanes which will automatically make the necessary allowance for the side drift of the machine. An airplane flying across the sea will drift to one side as much as twenty miles in an hour's flight, so that in such a wind an ordinary compass would be useless, while the new method of a ship's captain for calculating and allowing for the drift are hardly practical for an airplane. The new compass has a transverse beam, so that the aviator can see the earth below through it. On starting his flight he sets an arrow to the direction he wishes to go and then watches to see if objects on the earth more parallel to the arrow or go across it diagonally. If they move parallel the arrow is correctly pointed, and he knows there is no side drift. If the objects on the earth go across diagonally he must straighten out his course until their movement is parallel to his arrow, which will make an exact allowance for the drift.—Saturday Evening Post.

If present plans do not fail, Montreal will be devoid of slums in a few years.

An organization was completed recently which has for its object the elimination of slums through the establishment of proper dwellings, adequate parks and playgrounds, and the other requisites of a properly conducted city.

For some time spasmodic efforts at reform were made by various societies, such as the Metropolitan Parks Commission, the Board of Trade, charity organizations, the City Improvement League, and many other organizations, but all as isolated efforts.

It was decided to undertake immediately the work being carried on by the separate bodies, and also to carry on practical experiments in the building of model tenements.

### Millet's Difficulties.

Two of Millet's famous pictures, the "Bower" and the "Binders," were produced in a damp studio. Ineffectually warmed by a fire stove. In order to keep warm he would work with his feet in big wooden shoes stuffed with straw, himself enveloped in a heavy horse cloth with a blanket over which he put his head!

In these pictures Millet had simply sought to express the struggle of the artist with the phase of man's unending combat with nature. But "political" parties drew their conclusions. The "labor" party declared that these pictures protested against the misery of the laborer, while official critics said that the artist sought to set class against class.

At this time Millet willingly painted a signboard for a Parisian tradesman. But then he painted it so well in the end it figured in an exhibition of his works in the School of Fine Arts.

### Nickel in Soapmaking.

It will probably be news to the average abolitionist that the metal nickel is used in making his soap. And further, perhaps he would be glad to learn that although the nickel, finely ground, is mixed with the soap ingredients, the finished product contains none of it. This is so because the nickel acts as what the chemists call a catalyst—that is, its presence causes certain desirable changes to occur, although it takes no part in the chemical reaction. Offensive oils and those too thick for satisfactory use, when mixed with finely divided nickel and subjected to the action of a current of hydrogen, become deodorized and harder and suitable for the soap maker's use. Cottonseed oil, for example, after the nickel-hydrogen treatment, makes a satisfactory soap.—New York Post.

### "Come Ye to the Waters."

Julian Grande, who recently returned to England from little lands, has had some interesting things to say about Damascus. The pride of the district lies still in its rivers, Abana and Pharpar, but this does not hinder the citizens from pulling them with the refuse of the streets, making the water quite undrinkable in summer. Water is brought from a distance and sold in the streets at about a farthing a quart, and to buy a cupful of cold water and give it to "one of those little ones" is a typical act of eastern charity. Phos Moleine will buy water and then gather the thirsty children round them, using almost the words of Isaiah: "Ho, every one that thirsteth, come ye to the waters."

—Homiletic Review.

### Forces of Habit.

There is at Princeton an instructor in mathematics who was country bred, a fact that is frequently betrayed by some homely sayings of his.

One day an undergraduate had performed some peculiarly useless and complicated procedure arriving at the solution of a problem when the instructor said:

"This reminds me of a colt once owned by an old friend of mine down east. This colt was put out to pasture after having been bred from its birth in a box stall and watered at a trough in the yard. The pasture lay across a small river, and in the middle of the day the colt would swim the stream to get to the water and then drink of water."—Harper's Magazine.

### Oxford Terms.

A Rhodes scholar of Denver, speaking of Oxford, said:

"Oxford is a funny place. Magdalen is pronounced 'Maiden there. 'Pail terms' means three-quarters of a term. 'General admission' day is the day, not when you enter, but when you leave. An 'ordinary degree' is one obtained by a special examination. An 'inspector of arts' is not an inspector, but a student."

"Confused by these things, a new Rhodes scholar said:

"How queer by flag! How queer it all is! And if I go to the Oxford depot and ask for a ticket by train to London will they give me a passage by steamer to Marseilles?"—Exchange.

### The Great Victim Makers.

Anton Anderson, the notorious violin maker of Cremona, lived 1044-1737, he was the pupil of Nicholas Amati and carried the "cremona type" of violin to its highest perfection. The Amati, Nicholas and his sons, Jerome and Antonio, rank next to Stradivari if not with him. The Tyroler makers, Jacob Stainer, 1699-1756, and Matthew Klotz and his sons made violins that stand very high in the estimation of connoisseurs. Villanov's violins are the most celebrated modern makers.

Send over a little cradle And the dust of the world will fly! The grief and burden and battle And the sorrow and pain will die. And there you will find the sunshine, Shining like a star on your face. You will learn what it is to follow All life with a lasting grace.

—Baltimore Sun.

Co-Ed. Oh, Mr. Spooner, you have no idea how much it meant to me when you kissed me last night.

Mr. Spooner—Really? I was so on my way home.—New Orleans Times-Democrat.

### A BALLADE OF UPKEEP.

I thought I wanted an automobile Of my own—I was young and awfully proud. I bought a car to an agent's appeal And purchased a stone one lunged machine With a shock for trouble and passion.

The purchase price, it was no great shakes, But the car soon shook this into my brain: 'Tis the upkeep cost of a thing that breaks.

I aught to make a political deal. Its benefits could be plainly seen. The boss of my district made me feel That the government soon on my strength should lean.

To get in the game costs little, I ween, But honor and fortune are in the stake. The methods aren't always exactly clean. 'Tis the upkeep cost of a thing that breaks.

"At least I will a wife prove cheap and hale." I thought, and while I would not be man I'll manage my home, and she will not squeal.

For my cash at night and morn and be seen. Also, she can come now on the scene. And charge of my bank account she takes.

From her I can find no legal screen. 'Tis the upkeep cost of a thing that breaks.

L'ENVOI. Prices of lickens I am the dean. So I'll be well for your fortune's sake. First cost doesn't make the waltz leap. 'Tis the upkeep cost of a thing that breaks.

—Chicago Daily News.

### There Are Such Men.

"Here an excellent fellow in every respect but one," was the reply. "I'm not sure he doesn't know how to play cards."

"No; so much the worse, for he always loses."—St. Louis Post-Dispatch.

### His One Failing.

A man inquired of his future son-in-law's father regarding his character.

"He's an excellent fellow in every respect but one," was the reply. "I'm not sure he doesn't know how to play cards."

"No; so much the worse, for he always loses."—St. Louis Post-Dispatch.

### Rutted.

"Well, Blinky, have a good tour in your new car?" asked Hinklenooper.

"Pretty good," said Blinky. "How did you find the roads up in Maine?" asked Hinklenooper.

"By following the rut," said Blinky. —Harper's Weekly.

### Have To.

"Young Bliff and Miss Wapple fell out yesterday."

"Do you think they will make up again?"

"I'm sure Miss Wapple will. They fell out of a motorboat."—Birmingham Age-Herald.

### Oh!

"That woman can do anything with figures," remarked the boob.

"What is she—a bookkeeper?" asked the cheerful idiot.

"Now," replied the boob: "she's a dreamer."—Cincinnati Enquirer.

### Proper Procedure.

Judge—So you are going to plead the writt'n law?

Lawyer—Yes, your honor. Judge—Then you can do it with speeches arguments. —Baltimore American.

### In Style by Accident.

Agnes—Where did you get the new suit dress?

Carrie—It's my old bobbie. I got the suit in it stopping from a street car this morning.—Youngstown Telegram.

### Not the Head.

The father had gone away and left his only son in charge of the shop.

"Are you head of the firm?" asked the man with a sample case, who had just come in.

"No, sir," remarked the young man. "I'm the tail of the firm of the head."—London Tit-Bits.

### No, He Wasn't Elected.

Miss Josephine Albert, excited when he proposed? Miss Violet—Well, we were in his car and he ran it backward for more than a mile without noticing it.—Chicago News.

## DOMINION'S EXPLORER

VILJALMAR STEFFANSON WILL  
FLY THE CANADIAN FLAG.

Daring Young Scientist Who Starts For the Arctic Circle in May Will Be Early Watched by Canadian Since Government Has Assured His Support—Ridley College Master is to Go With Him.

Viljalmar Steffanson, the famous discoverer of the blond Eskimos, who will be sent on a polar expedition next year on behalf of the people of Canada, will start from Victoria, B.C., in May in a whaler, belonging to Stefansson, and will stay in the north four years.

Steffanson is a Canadian by birth, although of Icelandic descent, and it may account for his desire that Canada share in the honor of the discovery of the lost white tribe. Certain United States interests relinquished a claim in the subsequent discovery of this explorer on condition that the Canadian Government back it financially. In the subsequent discovery of the next trip will be those that lie within Canadian boundaries, hence it is considered right that the Dominion finance the trip and receive the benefit.

Steffanson's previous expeditions lasted five years and ended in the middle of 1912, the findings forming the basis for interesting ethnological studies. It is his theory that the blond, red-haired, blue-eyed people, who dwell on Coronation Bay and on Victoria Island, Prince Edward Island, are direct descendants of Norsemen, who sailed 800 A.D. for the coast of Greenland, but missed their course and landed on Newfoundland, hence were the discoverers of America. They numbered about 1,000 and made two considerable settlements.

Steffanson's previous expeditions lasted five years and ended in the middle of 1912, the findings forming the basis for interesting ethnological studies. ## I am Better

is the best remedy known for sunburn, heat, rash, eczema, sore feet, stings and blisters. A skin food!

All Druggists and Stores—Big.

## The Most Modest of Men

Abraham Lincoln felt deeply the responsibility that rested on him as president of the United States, but he shrank from assuming any of the honors, or even the titles of his position.

After years of intimate acquaintance, public men testified shortly after Mr. Lincoln's death that he could not recall a single instance in which he spoke of himself as president, or used that title for himself, except he acted in an official capacity.

He always spoke of his position and office vaguely, as this place, here, or in other modest phrase. Once, speaking of the room at the Capitol used by the president of the United States at the close of a session of congress, he said: That room, you know, that they call—dropping his voice and hesitating—the president's room.

To an intimate friend who addressed him always by his own proper title, he said: Now call me Lincoln, and I'll promise not to tell of the breach of etiquette—if you won't—and I shall have a resting spell from Mr. President.

All persons agree that the most marked characteristic of Mr. Lincoln's manner was his simplicity and artlessness, but his native dignity never forsok him, and with all his amabilities and disregard of conventionalities distinguished foreigners were invariably impressed by his fine fibre.

A diplomat, whose knowledge of French was superior to that of the English language, said:

He seems to me one grand gentleman in disguise.

When Holloway's Corn Cure is applied to a corn or wart it kills the roots and the callous comes out without injury to the flesh.

Along in the sixties Pat Casey pushed a wheelbarrow across the plains from St. Joseph, Mo., to Georgetown, Col. Shortly after that he struck it rich, in fact he was credited with having more wealth than anyone else in Colorado. A man of great shrewdness and ability, he was exceedingly sensitive over his inability to read or write. One day an old-timer met him with:

How are you getting along, Pat? Go away from me, now, said Pat, gently, me head's bustin' wid business. It taken two lead pencils a day to do me wurrit.

## Minard's Liniment Cures Diphtheria

An English physician, being annoyed by the talk of a pedantic, self-confident bore until he could stand it no longer, remarked: My friend, you and I know all that there is to be known. How is that? asked the bore, highly pleased.

Why, said the doctor, you know everything except that you are a fool, and I know that.

## A Sweet, Crisp, Delicious "Bite-To-Eat" Post Toasties

Dainty bits of pearly white corn, perfectly cooked and toasted to delicate "brown."

Usually eaten direct from package with cream and sugar.

Or, sprinkle Toasties over a saucer of fresh berries—then add the cream and sugar—a dish to remember.

Post Toasties are sold by grocers everywhere.

Canadian Postum Cereal Company, Ltd., Windsor, Ont.

W. N. U. 959

## For the Earache

I am afraid I have greatly interfered with my own practice, said a celebrated surgeon, by giving the following advice to many of my friends: At the first symptoms of earache, let the patient lie on the bed with the painful ear uppermost. Fold a thick towel and tuck it around the neck; then with a teaspoon fill the ear with warm water. Continue doing this for fifteen or twenty minutes; the water will fill the ear cavity and flow over the head, let the water run out, and plug the ear with warm glycerine and cotton. This may be done every hour until relief is obtained. It is an almost invariable cure and has saved many cases of acute inflammation. The water should be quite warm, but not too hot.

## NERVOUS TROUBLES ON THE INCREASE

They Are Due to an Impoverished Condition of the Blood

Nervous exhaustion—or neurasthenia, as medical men call it—is one of the greatest evils of the present day, for it is destroying the life and energy of thousands of men and women, driving them to insanity. The causes of this trouble include overwork, mental strain, worry, indigestion, and sometimes it follows a gripp. The cases of this trouble are usually great weakness after exertion, nervous headaches, trembling hands, shakiness in the legs, irritability of temper, weak digestive power, insomnia. The life of the sufferer becomes full of misery.

The true treatment for this trouble must consist of a building up process, for the a-l-v-e sign means that the exhausted nerves are calling for more nourishment from the blood supply. Dr. Williams' Pink Pills make new rich blood that feeds the starved complaining nerves, and in this way they have cured thousands of times neurasthenia, neuralgia and other nervous disorders, and have restored strength and nerve-energy to despairing people.

Mrs. Isaac Wilson, Calabogie, Ont., gives thanks for having been restored to health through the use of this medicine, she says: "When I began using Dr. Williams' Pink Pills I was in a wretched wreck; I couldn't do my work, could not sleep at night, suffered from nervous headaches, and the least noise would completely upset me. Only those who have suffered from nervous trouble can tell what I endured. I doctored for a time, but did not get any benefit. Then I learned of Dr. Williams' Pink Pills and sent for a half dozen boxes. By the time I had used these I was almost well, and a couple more boxes completely restored my health, and I have had no return of the trouble. I can cheerfully recommend Dr. Williams' Pink Pills to those who suffer from any form of nervous trouble."

If you are weak, nervous or out of health begin to cure yourself to-day with Dr. Williams' Pink Pills. You can get them from any medicine dealer or by mail at 50 cents a box or six boxes for \$2.50 from "The Dr. Williams' Medicine Co., Brockville, Ont."

The London Daily Citizen publishes the following joke on itself: They are telling a good story about The Daily Citizen in Fleet Street, and as this is a paper not afraid of a joke against itself I shall be forgiven for repeating it. A bricklayer, in a transient near the Elephant and Castle was reading The Daily Citizen, and a member of the staff who happened to be the car was gratified by the fact. It is pleasant to see workers reading their own paper and learning about the conditions of their fellow workers. He leaned forward and got into conversation with the bricklayer and commented on the title of the journal he was looking at. Ay, ay, said the loyal reader, it's not a bad paper, not half a bad paper. It would be quite right, they didn't have all this stuff about labor in it.

The servant were absent and the doctor answered the bell himself. A colored man stood on the steps holding a large package. He said: I am Miss Matilda, the cook, at home, said the doctor.

Yes, but she has returned, returned the doctor.

Can I lead her to her, said the cook, that put such new spring into her yer dishpan. He said 'im for sho.

He Explains. I hear you passed my wife on the street the other day and said she was not much more dead, man. You see my wife was alone and she asked me if I didn't think your wife a perfect beauty. As a married man yourself you know that was my cue to disagree.

The explanation was accepted.

Scrubber—Whatever the critics may say about my novel, they can't say I have stolen any other man's ideas. Tinsler—Should try that next time Bertie, if I were you.

## Funny Mixups

Two of the boys were discussing blunders made by nervous or absent-minded people. One told of a man who had married a woman who was the rattled bridegroom who asked the clergyman if it were still Kistomary to occupy the room told him about the story of the woman who said to the usher in the church: May I occupy this room? The usher, who replied: No, but I'll show you to another seat.

The next time he told of one who on the Fourth of July orator who referred to George Crossington, wailing the Delaware. The orator was told that with the story of the young actor who was expected in a particular play to rush on the stage in great excitement and say: The queen has swooned!

He showed the necessary excitement and called out: The swoon has swooned! and then corrected himself and said: The swoon has swooned, and when the audience began to laugh he tried again with: The swoon has swooned, when he was dragged off by the stage manager. As he disappeared he was heard to say something for which in Queen Elizabeth's day he would have been beheaded.

## Minard's Liniment Cures Colds, Etc.

An old Scotch lady was compelled to carry an ear trumpet with her wherever she went. Upon visiting a small church in Scotland not long ago she was watched very suspiciously by the sexton until she reached her seat. Then, as if he could stand the suspicion no longer, he went over to her and shaking warning finger emphatically, he said: Madam—one to two, and you're out.

## The Request

Did Baron Fouché ask you for my hand, father? asked Oswald, to the man, he replied Mr. Cumro, for he called to discuss a marriage settlement. He didn't mean for your hand, he asked for my pocketbook.

## Irrigating the Desert

The common opinion that there is no water in the desert of Sahara is quite incorrect, for in all parts of the great desert that are inhabited there is plenty of water. The trouble is to find it, for it lies at unknown depths below the surface of the sandy wastes.

It is the mission of a party of ardent land diggers operating in the south of Algeria, to discover and make use of this hidden water, and in February last, the engineers of the expedition opened a well that has claimed the world's record, having a flow of 8,000 gallons a minute.

This is in the oasis of Toiga, about 22 miles west of Biskra. The water is 150 feet beneath the surface and forges a small-vine that will make it possible to irrigate about 8,000 acres of land.

During the past ten years wells have been bored which produced 600 gallons of water a minute, making 116,000 gallons since the French have occupied the land. This is a possible 1,800,000 date palms in which lies the wealth of Southern Algeria.

## WERE TRIED AND STOOD THE TEST

### DODD'S KIDNEY PILLS MAKING A REPUTATION IN THE WEST

Saskatchewan Man Tells How They Cured Him After Four Months' Suffering from Backache and Other Forms of Kidney Disease.

St. Phillips, Sask., (Special)—In a new country where changes of climate and impure water are among the difficulties to be overcome, kidney trouble is prevalent. It is the kidneys, the organs that strain the impurities out of the blood, that first feel any undue strain on the body. Consequently, Dodd's Kidney Pills have been well tried and tested in this neighborhood.

They have stood the test. Many sufferers tell of backache, rheumatism and urinary troubles cured by Dodd's Kidney Pills. Mr. Otto Oickewski is one of these. In speaking of his cure he says:

I suffered from kidney disease for four months. My back ached, I had heart flutterings, and was always tired and nervous. My skin had a harsh, dry feeling, my limbs were heavy, and I had a dragging sensation across the loins.

I consulted a doctor, but, as I did not appear to improve, I decided to try Dodd's Kidney Pills. I used six boxes, and now I am well.

Dodd's Kidney Pills always stand the test. Ask your neighbors.

## No Use at School

Now that Little George had attained the age of six, the great problem of his education became the burning question of the hour. The family decided that Little George must go to school immediately. Little George himself firmly maintained that he would do nothing of the sort, and accordingly the more matters of the school world had very much the same effect upon him as a red rag is alleged to have upon a bull. Graciously, however, who knew nothing of the difference of opinion in the family, ventured to remark one day: Your father tells me, George, that you are going to school next week. Then he said: I'm not going to school. Why, granny, I can't read and I can't write so what good school I do at school, I would like to know.

### Makes Better Tea and More of It

## He Got The Earth

Some months ago excavations were being made for new tracks on the line of a certain famous railway. At one point a nearby resident obtained permission to remove a quantity of turf to reseed his premises, the section boss being instructed to notify the excavating gang when the resident should have secured all he desired. The Hibernian's report is as follows: The man that wasted the earth has got it.

Dugald was ill, and his friend Donald took a bottle of whiskey to him. Donald gave the invalid one glass and said:

You'll get another yin in the morning. About five minutes elapsed, and the invalid suddenly exclaimed: "Ye'd better let me have the other now, Donald, ye hear o' sae many sudden deaths nowadays."

On a recent examination paper in civics was the question: "What are the duties of a citizen?" The student who answered: "To vote, to pay taxes, to obey the law, to support the government, to defend the country, to respect the rights of others, to be a good neighbor, to be a good citizen." The undertaker.

Robert, a boy of twelve, thought for some time, trying in vain to recall the name of the man who had been killed at a happy inspiration came to him and he answered: The undertaker.

Building Good Roads in Michigan. Here is the way that the State of Michigan got good roads: In one day 8,000 men, with 4,000 teams and 750 automobiles, having volunteered for the purpose, built 250 miles of good roads passing through forty-four townships. This means is open to any community which can develop the right kind of public spirit.

## Anaemic Condition or Bloodlessness

A peculiar pallor or even ghastliness of the skin is the marked symptom of anaemia. The system is weak and lips appear to be almost bloodless. The cause of this condition is the absorption of red corpuscles from the blood.

The anaemic patient is usually thin and weak, but may be fleshy and inclined to droop. Stomach troubles and weakness of the bodily organs are accompanied by a general loss of strength.

Red corpuscles must be added to the blood, and this can best be accomplished by using Dr. Chase's Nerve Food.

This great food cure is so gentle

## Bad Blood

Is the direct and inevitable result of irregular or constipated bowels and clogged-up kidneys and skin. The undigested food and other waste matter which is allowed to accumulate poisons the blood and the whole system. Dr. Morse's Indian Root Pills act directly on the bowels, regulating them—on the kidneys, giving them ease and strength to properly filter the blood—and on the skin, opening up the pores. For pure blood and good health take

Dr. Morse's "Indian Root Pills"

## Quickened Frozen In

In excavating recently for the foundation of a large building in Berlin, the workmen found it necessary to go 10 feet below the foundations of the adjoining buildings. They rested on quicksand, which would have flowed from under them had the builders not used an ingenious method to keep the sand from slipping away. It consisted in solidifying the sand by the use of new excavation. Five-inch freeze pipes, closed at the bottom, were sunk three feet apart all around the edge of the pit. The pipes contained one-inch pipes that were open at the bottom and connected with a supply header at the top. The five-inch pipe was connected with a drain header. Brine, which was pumped from a refrigerating plant, passed down the one-inch pipes, up the five-inch pipes, back into the drain header and thence to the brine tank.

## And Mothers, Too

Mother, said the small boy at the piano, may I quit practicing for a while? "Why? Are your hands tired?" No. My hands aren't, but my ears are.

## A BOUQUET OF FLOWERS

It Told a Story Without Words

By EMILY WESTBROOK

Mrs. Van Tromp of New York was a globe trotter. She was a widow with one daughter, Madeline, who was obliged to live with her mother, but would rather have remained at home, for Miss Madeline was a sensible girl and, although not averse to seeing foreign lands, was not inclined to spend her life in circling the world.

In their wanderings the Van Tromps found themselves in Bombay, India, having done that country so far as women tourists could. Mrs. Van Tromp was much impressed with the display of wealth of the rulers and especially the jewels with which they decorated themselves, for ornaments are dear to the feminine heart. It is quite likely that if a rajah, covered from his waist up with gems, had asked for the hand of her daughter she would have given her consent instantly.

But a globe trotter cannot remain in one place or the term would be a misnomer. The Van Tromps left the city of Bombay to sail across the Arabian sea and pass through the Red and Mediterranean seas to London. Such a journey in a single vessel required a great deal of time, and those cooped up together in her as before the hand of the ship would be a very uncomfortable one.

Mrs. Van Tromp was sitting one day on deck in a steamer chair reading an erotic novel when the wind blew her veil off her head and sent it sailing astern. It was picked up by a gentleman with a tawny, drooping moustache who handed it to her with a profound bow. He was so distinguished looking that instead of giving him the conventional thanks that she would have accorded an ordinary person she bestowed them with her most charming smile. The gentleman assured her that she was welcome and further remarked that since the day was a trifle windy perhaps he had better find a more protected spot for her. He accepted the offer, and the gentleman removed her chair and rug to the lee side of the wireless telegraph office, where she was more comfortable.

Now Mrs. Van Tromp was a woman of fifty, while the gentleman could not

HE THOUGHT IT GOOD THAT A MAN SHOULD BE CARREYING FLOWERS.

have been much over thirty. There was therefore no inpropriety in her entering into conversation with him about the weather, the usual occasion for a long confinement within such narrow limits, and other small talk incidental to shipboard. The gentleman spoke with an English accent such as Mrs. Van Tromp had heard among certain well acquainted she had made in London. While they were chatting Miss Madeline came up breathing the wind and joined her mother.

"My daughter, Mr. —," said Mrs. Van Tromp by way of introduction, stopping for her new found friend to supply the deficiency of his name.

"Madeline,"

"Mr. Mackridge has been kind enough to keep my veil from going overboard and to move my chair out of the wind."

The gentleman bowed, and Miss Van Tromp inclined her head in recognition. He provided her with a chair and stool near and he did not permit them from her mother to occupy one himself, in their company.

This was the beginning or one of those tourist acquaintances that, informally made, often ripen into strong friendships. Mrs. Mackridge was especially attentive to Mrs. Van Tromp, who was especially gratified at being an object of consideration from one so much younger than herself, and she regarded it a proof that he had been brought up by some aristocratic family who had not broken away from the tradition of respect for age. This view was confirmed by Mr. Mackridge himself, who when accused of it confessed, it stating that he was the next younger brother of the Marquis of Goldingray, one of the oldest families in Ireland. He furthermore let it be known that the marquis was a bachelor and in ill health.

This was quite enough to induce Mrs. Van Tromp to lay plans for a union between Mr. Mackridge and her daughter. The mother cast off her regret that she couldn't marry Madeline to a rajah and became interested in the more practicable scheme of marrying her to a man who was likely to become a marquis. The first time after having received this information that Mr. Mackridge joined her and her daughter on deck she made an excuse to go below in order to leave them together.

Mrs. Van Tromp had become such a traveler that she was not averse to picking up acquaintances during a voyage, but she seldom became familiar with them. Mr. Mackridge evinced a desire for her companionship, but found as the journey proceeded that he was not permitted to come to terms of matrimony. Mrs. Van Tromp recalled his attentions to her daughter and could not understand why Madeline gave no more cordial response.

"My dear," said the solicitous mother, "if you would be more civil to Mr. Mackridge it might be of great benefit to us. He tells me that his brother has a house in London and is usually there during the season. We may be invited there and meet many persons of rank."

"I thought his brother was a bachelor. Bachelors don't usually entertain."

"Oh, Madeline, you don't grasp things as you should. You will never take the position you should because you have no push. The fact that Mr. Mackridge's brother is a bachelor should lead you all the more to cultivate him."

"I have thought, mother, dear, that you preferred I should cultivate Mr. Mackridge himself."

Mrs. Van Tromp made a grimace, but accorded no reply to such stupidity, she certainly considered any girl stupid who would encourage a younger brother of a marquis, even though the marquis himself was in bad health.

During the passage of the Red sea Mr. Mackridge continued his attentions, and Mrs. Van Tromp was pleased that Madeline seemed more disposed to accept them. This acceptance could not be construed to mean encouragement, but Mrs. Van Tromp felt more hopeful, and Mr. Mackridge took advantage of it to be more attentive. He gained a point with Mrs. Van Tromp by letting out the fact that he was a captain in a British regiment stationed in India, all the officers of which were soldiers. He had proved a record of absence to go into the field, having been informed that his brother, the marquis, was falling rapidly.

After receiving this additional information Mrs. Van Tromp conceived the idea of going ashore in Captain Mackridge's company on the ship's arrival at Gibraltar. He, being a British officer, would doubtless be hand in glove with the officers of the garrison and would be able to secure for the Van Tromps special privileges. She hinted to Mackridge that she would be pleased to have him with her and her daughter when they visited Gibraltar, and he accepted the invitation with alacrity. But when they reached the port the captain was confined to his stateroom with a severe indisposition and was unable to leave the ship.

All went well with the trio who were performing this little comedy during the latter part of the voyage. Just before leaving the steamer Captain Mackridge managed to obtain a large bouquet of flowers. Whether he bought them from a bouquet or whether he had been "diverted" aboard the ship does not matter. The important feature is that he presented them to Miss Van Tromp. The gift was made with the mother and daughter, accompanied by the captain, were about to pass down the gangway. The young lady, however, had her perfume and jewelry packed down for the dock with them in her left hand, carrying a piece of hand baggage in her right. On reaching the dock she suddenly remembered leaving some article in her stateroom.

"Please—take these," she said to Mackridge, handing him the hand baggage and her bouquet, "and keep these till I return. I'll be back in a few minutes."

Mackridge took the articles, a certain suspicion appearing about his mouth and an anxiety in his eyes as he did so. Miss Van Tromp ran up the gangway, passing with difficulty those coming down, and disappeared within the ship. A customs inspector, who was watching for smugglers, noticed a gen-

tleman strolling with a large bouquet in his hand and pondered. Had a lady been carrying it his attention might not have been attracted. Suspicious as all customs house officials are, he thought it odd that a man should be carrying flowers, and possibly it might be used as a means of concealing dutiable goods.

"I'll look into that, sir, if you please," he said to Mackridge.

The whiteshirt about the latter's mouth turned to a sickly pallor as the inspector took the bouquet from his hands. Pulling it apart, several articles wrapped in white tissue paper fell on the dock. The inspector picked them up, unwrapped one and a large diamond glinted in the sunlight.

When Madeline Van Tromp rejoined her mother she found her alone.

"Where's Captain Mackridge?" she asked.

"Gone under arrest for smuggling." And she recounted the discovery of the jewels.

"All he wanted of me," said Madeline, "was to carry the bouquet ashore for him. I suspected something of the kind and turned it back into his hands on purpose."

Where Ma Draws the Line.

Ma's not jealous of pa.

Not bit, she says.

There's no jealous streak

That she makes up her mind

She's been married too long

To keep watch over him.

But she won't let him touch

Pretty girls how to swim.

There isn't a woman

On shore that she fears.

But Sue's been married to pa

Now for twenty-seven years.

And she isn't afraid

Of a girl's silly whim.

But she won't let him touch

Pretty girls how to swim.

Ma says she's not jealous—

Oh, no, not a bit!

Pa's dance with the girls

But he's ready to quit.

Sue's been married too long

All that's coming to him

If Ma catches him touching

The girls how to swim.

—Detroit Free Press.

A Hopeless Case.

The teacher was trying to break

James of saying "I have went," but

the task seemed hopeless. So as a last

resort she had him stay after school

and write twenty times on the black-

board "I have gone home."

While the child was occupied the

teacher left the room. I was still absent

when James finished the task, and

to acquaint her with the fact he wrote:

"Dear Teacher—I have went what you told me and have went home."

—National Food Magazine.

The Fashionable.

She mince as she flows the street

As timid bathers start in swimmer—

As she heads handcuffs on her feet.

Or bound them like the Chinese women.

That narrow skirt has never a split,

For though she's stylish, still she's modest.

Of a—the idea that ever hit

The sex, this is the very oddest!

But she's not "mannish" as I find

The critic of the day now says her.

What man has ever thought to bind

Both legs within a single trouser?

—Cleveland Plain Dealer.

Too Late.

A boy wrote to me for a supply of cash.

Appended to the letter was the following postscriptum:

"I felt so ashamed at having asked you to send me \$10.00 I ran to the postoffice to get my letter back. Unfortunately, it had gone.—St. Louis Post-Dispatch."

A Woman's Jay.

"I like tall men," she said, and he

was five feet five; no more.

"I don't like tall men," said she.

He scratched his wig he wore.

"I like men who have wit," she said.

He had no wit at all.

"My husband's nose must not be red."

His nose was red and small.

"Oh, will you be my wife?" said he.

With eager earnestness

She listened while he made his plea.

And gladly answered, "Yes."

—Chicago Record-Herald.

In Paris.

Mrs. Newbrocks—Dear me! We must

leave Paris tomorrow, and we are

only up to page 19 of the guidebook.

Mrs. Newbrocks—Mark my place, and

we'll come back next year and begin

at page 20.—Puck.

One View of Music.

And music, whatever people say, is

who is not thoroughly sincere in dealing

with himself.

## AN UP AND DOWN DIALOGUE.

Brother and Sister Disagree on a Question of Hills.

John to his sister Sue, who has been motoring with her beau—Did you have a pleasant trip, sister?

Sue to her brother John—Oh, it was just lovely! And we went over mountains—just up one hill and down another, for ever such a distance.

"You went how?"

"Up one hill and down another."

"Did you have an awful climb?"

"Of course not, you silly!"

"Then how did you go up one hill and down another?"

"In the auto or perfectly level road. The hills were not so high that you would have to fly."

"What you mean, sis, dear, is that you went down one hill and up another—not up one hill and down another?"

"Don't ask silly! How could we get to the top of a hill to go down a hill if we didn't go up first? We certainly went up one hill and down another, just as I said."

"You certainly did not. You went down one hill and up another, just as I am telling you. You may have gone up one hill and down that same hill, and then you went up another hill and down that same hill. You see, sis, dear, before you could go up one hill and down another hill altogether you would have to have an alibi to fly from the top of this first hill to the top of that other hill, and you admit that you did not do that."

But Sue did not wait to hear the rest.—Lippincott's.

Why He Wears Glasses.

It happened in the park one Sunday morning. Todd and Edgeley were sitting there together, discussing, needless to say, the eternal and feminine question.

"Yes," said Todd, "I quite agree with you; the way women dress nowadays is positively absurd."

"It's worse than that," added Edgeley. "What's more, in nine cases out of ten, their men folk are to blame."

Todd sighed.

"I suppose that is so," he remarked.

"Yes. Look at that woman coming toward us now. I'll bet you anything you like that her husband tells her she looks positively charming when she goes out in that outrageous get-up. Just because he isn't the luckiest to say the truth, to laugh at her, to."

But Todd had risen to his feet and, hat in hand, a happy smile upon his face, was awaiting the lady this way referred to. The lady was Edgeley's wife.—London Answers.

Statement Time.

When the mail man passed Johnny Jones said to Willie Green:

"Look, I think he is going into your house."

"Yes," said Willie, "we got lots of letters. Sometimes we get as many as three at one time."

"Huh!" ejaculated Willie. "You ought to see the letters my papa gets the first of every month."—Youngstown Telegram.

An Exaggerated Report.

Lindstrom—I hear that Billums turned all his property into bonds, diamonds and such things, married a chambermaid, and left everything to a college.

Janter—Oh, he wasn't so mean as that. In the terms of the will the college will have to employ the son at a salary of \$7 a week to cut off its coupons.—Judge.

After She Finished With Him.

Angry Woman—My husband attempted to strike me. I want to have him arrested.

Police Captain—All right. Where will we find him?

Angry Woman—in the Emergency hospital.—Chicago Daily News.

Remained a Commuter.

The fact that Mr. Joseph Chamberlain recently celebrated his seventy-seventh birthday reminds one that although he might have gone to the House of Lords if he had liked, he preferred, like Mr. Gladstone and Mr. Balfour, to remain a great Commuter. He still remains a member of Parliament, although his health has not permitted him to participate in political work for a number of years. He is spending the evening of his days in quiet retirement at his home in Grosvenor residence, tenderly and devotedly cared for by his clever wife.

## "EAT LIME," HE SAYS

RUDOLPH EMMERICH HAS FOUND A NEW PANACEA.

He and Dr. Loew Declare That Dehydrating Chalk Is the Infallible Cure For a Host of Diseases—Feeding Young Animals on Calcium Chloride Promotes Their Growth Amazingly.

Munich's famous bacteriologist, Rudolph Emmerich, and another famous Munich man, Dr. Loew, hold that swallowing chalk is the infallible means of health. They say that if only people will add to their food a sprinkling of calcium chloride they will grow bigger, stouter, and stronger; they will resist disease, be always in a good temper, and live so long they will die of boredom with life.

Emmerich is professor of hygiene and bacteriology in Munich University. He has eaten queerer things than chalk. In 1895 Abdul Hamid brought him to Constantinople to study the cholera, and Emmerich ate several thousand cholera bacilli and inoculated his blood with other germs. He survived the ordeal, and no claims that while eating cholera germs is merely harmless, the daily consumption of a sprinkling of chalk is curative and invigorating.

Emmerich and Loew have just concluded a series of experiments to test the influence of calcium chloride on the human body and the bodies of animals. They soon discovered that feeding young animals on calcium chloride their growth and weight may be amazingly increased. Their first experiment was made on a litter of piglets. They divided the litter in two. In feeding one half of the litter they added to the food one

gramme of calcium chloride for every kilogramme of the piglet's weight. That is, they gave to each piglet one day a thousandth of its weight in calcium chloride. The other piglets were fed with exactly the same food as usual, and max. diet was contained in that they got no chalk. After seven weeks both batches were weighed. The piglets which had been chalked up were found to have increased by 155 per cent, and their rivals by only 75 per cent.

From this Emmerich and Loew conclude that the normal food given to animals is deficient in calcium enough lime. So they have made experiments with an ailing baby which had been putting on weight very slowly. Considerable quantities of calcium chloride were added to the infant's food every alternate week, and the weight each week minutely recorded. It was found that in the weeks when calcium chloride was added the rate of growth was one-third greater than in the weeks when ordinary food was given. Therapeutic calcium chloride was administered with food every week, and the infant grew more than normally big, strong, and animated.

In the need of the animal body for lime there is nothing new. The novelty is in feeding animals with so much lime. In the human body, lime is found in the bones of the skeleton, and in the heart muscles, which contain four times as much as their share of lime. Lime is normally found in large quantities in bones, lungs, and grey substance of the brain; but lime is found in the muscles, except in the heart muscles, which contain four times as much as their share of lime. Lime is normally found in large quantities in bones, lungs, and grey substance of the brain; but lime is found in the muscles, except in the heart muscles, which contain four times as much as their share of lime. Lime is normally found in large quantities in bones, lungs, and grey substance of the brain; but lime is found in the muscles, except in the heart muscles, which contain four times as much as their share of lime.

It is not enough. The chief articles of diet—meat, bread, potatoes, and fruit of the tree—do not contain lime, and lime is poor in lime. Rice, lentils and other grains have much lime; figs have very little lime; apples, pears, cabbage, and strawberries and many other fruits are rich in lime. That is why milk is the best food both for children and adults.

### Smoking Habit Increasing

Between 1903 and 1912 the number of cigarettes consumed yearly has leaped from 2 billion to 12 billion. During the same ten years the increase in the use of little cigars has been from 440 million to a little more than 1 billion a year, or about 65 per cent. Cigars themselves have passed the seven billion mark. But whereas, ten years ago, half as many cigarettes were smoked as cigars, now half as many cigars are smoked as cigarettes.

#### The Perfect Car

This story of yours is all right, said the editor, but your description of the hero's automobile is simply impossible. If there was an automobile made as perfect as the one you describe, I'd buy one tomorrow. Where in the world did you get the idea?

That was easy, replied the author. I got my friend, Bragley, to describe his new car.

**WATERMAN'S**

At all Dealers 10c

**Waterman's**  
Ideal Fountain Pen  
In Waterman's Ideals it is a notable fact that gold pens can be had to suit every hand and character of writing. The more particular the writer the greater the satisfaction in using him. Back of the wonderful range of points in Waterman's Ideals, however, are other essential features which have made for fountain pen success: the famous spoon feed, the in-built chamber, friction cap, Ideal Clip, practical shape, pure Para rubber, the sizes, types, etc. Avoid substitutes.

**Getting Used to It**  
Why do you fish every morning in the bathtub, old man? Is it a bet?

**Oh, no; I just want to get used to not scratching anything. I am going on a vacation soon.**

The farmer had bought a pair of shoes in the city shop. Now, can't I sell you a pair of shoe trees? suggested the clerk.

Don't get fresh with me, sonny, replied the farmer, bristling up. I don't believe shoes can be raised on trees any more! I believe rubbers grow on rubber trees or oysters on oyster plants by gosh!

**HAD ITCHING PILES FOR 27 YEARS**

**Often Laid Up for Days at a Time—A Wonderful Tribute to Dr. Chase's Ointment.**

Few people were ever more enthusiastic in praising Dr. Chase's Ointment than the writer of this letter. When you read the description of his case you will not wonder why.

Mr. John Johnson, Coleman, Alta., writes: "Three years ago I was cured of blind-itching piles of 27 years standing by using Dr. Chase's Ointment. I used to think that death would be the only relief I would ever get from the terrible misery of piles. Often I was laid up for three days at a time, and at other times worked when I should have been in bed."

"Dr. Chase's Ointment is worth sixty dollars a box instead of sixty cents. I am a different man since using it. I am farming all the time, and never miss a day. Words fail to express my gratitude for the cure this ointment made for me. I cannot tell half as much about it as it deserves. Any one doubting this an write direct to me."

Dr. Chase's Ointment, 60 cents a box, all dealers, or Edmanson, Bates & Co., Limited, Toronto.

The oldest national flag in the world is that of Denmark, which dates from 1210.

Commercial contract rates upon application.

ROBERT WHITFIELD,  
Printer and Publisher.

CROSSFIELD, ALTA., NOV. 6, 1913.

## Alberta Violations of the Seed Control Act.

The following firms in Alberta have recently been convicted of breaches of the Dominion Seed Control Act:—

Henry Wilson, Edmonton.  
J. R. Hamilton and Son, Edmonton.  
J. B. Griffith, Stettler.  
J. Gilliland and Bro., Stettler.  
R. A. Webster, Cochrane.

All the above convictions were for selling grain containing noxious weed seeds without indicating the presence of the same as required by Section 6 of the Seed Control Act. In addition J. Gilliland and Bro., of Stettler were convicted of selling Timothy seed containing more weed seeds than allowed under Section 9 of the Act.

It is the intention of the Dominion Department of Agriculture to strictly enforce the provisions of the Seed Control Act throughout the West, and all persons handling seed should see to it that such seed is sold in accordance with the Act.

A well equipped Seed Laboratory is at the service of all who desire to have seed tested. Copies of the Act and information as to the same may be obtained from the Dominion Seed Branch, Calgary.

## Correspondence.

While our columns may be open for Correspondence we do not necessarily take their views of anything that may be stated.—Ed.

Crossfield, Alta.

To the Editor,  
Dear Sir,—Your correspondent of last week's issue under the heading of "Without Prejudice" (sounds as if he had to get a lawyer to write his letter for him), says "as regards my not being awake; I said that he was 'awakened,' but if he was not I apologise."

With regards to his other complaint, he seems to think that the Council pay me to devote my whole time to the duties of Village Constable, that is incorrect, if they did this what an expensive town Mr. Becker would have had.

If, while about town, either working or not as the case may be, I see, or my attention is brought to any of the By-laws being broken, I always try to attend to the matter at once. If either Messrs. Elliott, Jesman or Eagleson had spoken to or sent for me I should have come as soon as possible; and I would mention there is nothing to prevent those gentlemen placing the animals in the pound themselves. Mr. Becker seems to think he is the only injured one; I may mention the following gentlemen as having paid the fine and not kicking—Mr. Sackett two or three times, Messrs. Edwards and Goodland twice, Messrs. Wegener, Eagleson, McArthur and Westbrook once, so you will see that the only exception to the town case is Mr. Oricker, and which I have twice allowed the boy to take her from me (as I have also Mr. Becker and others), although legally directly I start driving I am entitled to the fine.

Bulls belonging to Messrs. Stokes, Edward and Captain Robinson. Horses, about ten, including our worthy chairman's.

Mr. Becker also says something about the scavenger work, although the correspondence commenced on the subject of the Pound law. I certainly welcome remarks from such an authority on sanitary matters as this gentleman. He complains about the work being done in the day time, he seems to forget (although one would not have thought it possible in so short a time), in what a shocking state the privies were in when I undertook the work, and the Council (who by the bye seem about the only people who

appreciate the work done) had been trying for months to get a man, and I imagine they thought it was better not to put more obstacles in the way than necessary in order to persuade a man to undertake work, and to do it regularly as I have endeavoured to do, to the best of my ability. Mr. Becker seems to forget that night work is charged at least double. Would he and others be prepared to pay that? I wonder what the Dairy Inspector would have said about his privy if he had called before it was brought up even to the requirements of the Local By-laws. I know Messrs. Inspectors' attention to Rule 108 in the Dairy Leaflet which he kindly gave me on one of his visits to this town.

Yours truly,  
FRANK MOSSOP.

## CANADA GAINS MUCH BY AMERICAN FACTORIES

Leading New York Newspaper Shows What Migration of United States Plants Means

(From New York American)

A reader of The New York American in Stonington, Conn., writes to tell us that he has read Governor Fox's statement about the driving of \$60 millions of capital out of the country because we do not pursue the policy of reciprocity, and he asks: "What kind of capital is it? Is it money, credit, real estate, intellect or pure manual labor?"

When a factory moves from New England to Canada, our loss is all of these. The wages, which support American homes and stores, go to support foreign homes and stores. The real estate comes on the market for sale. The intellect that runs the business and as many of the workmen as can follow the business and help to build up a foreign city. Credit also goes, for the American city and America are deprived of just so much assessable value.

Suppose that a small town is supported entirely by one big factory and that the factory moves away. The town will vanish, too.

The removal from the country of a big factory is a very real thing, a very real loss; not merely an occasion for theorising.
